**NEWS RELEASE**

**ARN OPTION TERMINATED**

March 10, 2005 - Robert C. Carne, President announces that Klondike Gold Corp. has informed the Company that it intends to terminate its option on the Arn property in southwestern Yukon. Klondike Gold's 2004 drilling tested two of 14 gold±copper skarn zones on the property, producing mixed results. Although ATAC has no plans for exploration at Arn in 2005, the Company sees good potential for additional work at some future date.

Negotiations are in progress regarding possible options for some of the Company's other gold projects, notably Golden Revenue and Panorama. In June and July, ATAC plans to work on two other properties, where 2004 exploration yielded particularly encouraging results.
